Code repository:

https://github.com/karthikdivvela/Heartdisease

Demo video:

https://drive.google.com/file/d/12ClKhZ_BUU53sPFQW_bvJB-7zr2UEPMo/view?usp=sharing

Deployed API / access:

10.103.55.10 only works on your lab machine while minikube tunnel is running. Adding the local option avoids confusion: “Not public; local: http://localhost:8000/docs (Docker); lab LoadBalancer: http://10.103.55.10/docs (see Section 9.4)”.
